Summary

Computer Science graduate with professional experience in frontend development, web applications, API integration, and software engineering. Proficient in React, TypeScript, JavaScript, Python, SQL, and modern web technologies with a strong interest in building scalable and user-focused software solutions.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, C, SQL, HTML, CSS

Frameworks & Libraries: ReactJS, Tailwind CSS, Django, Pandas, NumPy

Databases: MySQL

Web Technologies: REST APIs, JSON, API Integration, Responsive Web Design, CMS Platforms

Design Tools: Figma, Adobe Photoshop, Canva

Cloud & Tools: Git, GitHub, Postman, Azure Data Factory, AWS Cloud Practitioner, Jupyter Notebook, MATLAB

Experience

Ceburu Systems, Inc.

August 2025 – May 2026

Software Development Engineer

- Developed and maintained web applications using modern frontend technologies and RESTful services.
- Built responsive user interfaces and reusable components to enhance usability and maintainability.
- Integrated frontend applications with backend systems, ensuring reliable data processing and validation.
- Implemented data management features, including search, filtering, import/export, and bulk operations.
- Collaborated with cross-functional teams on software development, testing.

University of Texas at Tyler

Jan 2024 – May 2025

Technical Specialist

- Maintained and updated departmental websites using CMS platforms, HTML, CSS, JavaScript, and React-based templates supporting 300+ users.
- Improved web accessibility, usability, and digital engagement through content updates and website enhancements across multiple university platforms.
- Created digital signage, presentations, and promotional materials using Adobe Photoshop, Canva, and PowerPoint to support departmental communications and events.
- Provided technical support for AV systems, connectivity, authentication, and event registration platforms, ensuring smooth operations for faculty, staff, and students.
- Streamlined document management workflows using ImageNow/Perceptive Content and securely managed 1,500+ student records while ensuring FERPA compliance.

Centre of Excellence in Maritime and Shipbuilding (CEMS)

Jan 2022 – Aug 2022

Machine Learning Intern

- Performed data cleaning and preprocessing using Python (Pandas, NumPy).
- Implemented machine learning models for classification, regression, and clustering.
- Created dashboards and analytical summaries for project stakeholders.

Projects

Health Connect — Healthcare Database Management System

- Built a normalized (3NF) MySQL database with 30+ tables using ER diagrams, DDL scripts, and integrity constraints.
- Created SQL views and advanced queries for analyzing patient visits, provider metrics, billing records, and wellness participation.
- Modeled real-world healthcare data with support for many-to-many relationships and data reporting needs.

Heart Disease Prediction System

- Built Python ML pipeline (Pandas, NumPy) applying Logistic Regression, Decision Tree, Random Forest, and Neural Networks; best model achieved 95% accuracy on Kaggle heart disease dataset.
- Led data cleaning, feature engineering, and EDA using Matplotlib and Seaborn to surface clinical insights.

Education

Master of Science in Computer Science

Aug 2023 – May 2025

University of Texas at Tyler

GPA: 3.6

Bachelor of Technology in Electronics and Communication Engineering

Jun 2019 – Aug 2023

Sri Padmavati Mahila Visvavidyalayam

GPA: 7.8
