Professional Summary

Software Developer with experience building responsive web applications using React, TypeScript, JavaScript, Python, Django REST Framework, SQL, and REST APIs. Skilled in reusable UI components, web accessibility (WCAG 2.1), API integration, debugging, testing, and cross-browser development in Agile environments.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, C, HTML5, CSS3

Frontend: React.js, React Hooks, React Flow, Tailwind CSS, Vite

Backend & APIs: Django, Django REST Framework, REST APIs, JSON

Databases & Data: PostgreSQL, MySQL, Google Sheets, Pandas, NumPy, scikit-learn, Matplotlib, Seaborn

Accessibility: WCAG 2.1, ARIA, Semantic HTML, Keyboard Accessibility, Color Contrast, Omni CMS

Testing & Tools: Playwright, Cypress, axe-core, Git, GitHub, Postman, Figma, Vercel, Render

Practices: Agile, SDLC, Debugging, E2E Testing, Code Reviews, Performance Optimization

Experience

Ceburu Systems, Inc.

August 2025 – May 2026

Software Development Engineer

- Developed, tested, debugged, and maintained full-stack web application features using React, TypeScript, JavaScript, HTML5, CSS3, Django REST Framework, PostgreSQL, SQL, and REST APIs for an enterprise network management platform.
- Built reusable React and TypeScript components using React Hooks and React Flow for responsive network topology interfaces, improving usability, performance, and maintainability.
- Integrated frontend applications with backend REST APIs using JSON, implementing client-side validation and asynchronous data handling while diagnosing production issues to improve application reliability.
- Implemented search, filtering, import/export, and bulk operations while testing functionality, debugging defects, and optimizing application performance and scalability.
- Collaborated in Agile teams using Git and GitHub to develop features, participate in code reviews, troubleshoot production issues, document solutions, and incorporate engineering feedback to improve software quality.

University of Texas at Tyler

Jan 2024 – May 2025

Web Developer

- Developed, maintained, and enhanced departmental websites using Modern Campus CMS (Omni CMS), HTML5, CSS3, JavaScript delivering responsive, accessible, and cross-browser compatible web experiences.
- Created, edited, and published web content while improving site navigation, information architecture, page layouts, branding consistency, and usability across multiple university web properties.
- Improved digital accessibility by applying WCAG 2.1 best practices, semantic HTML, accessible content structures, navigation, and multimedia while troubleshooting website usability and accessibility issues.
- Created digital signage, presentations, and promotional materials using Adobe Photoshop, Canva, and PowerPoint while collaborating with faculty, IT teams, and campus stakeholders on digital communications and website enhancements.
- Streamlined document management workflows using ImageNow (Perceptive Content), securely managing 1,500+ student records while maintaining FERPA compliance and supporting departmental technology needs.

Centre of Excellence in Maritime and Shipbuilding (CEMS)

Jan 2022 – Aug 2022

Machine Learning Intern

- Performed data cleaning, preprocessing, and exploratory data analysis using Python, Pandas, and NumPy to prepare structured datasets for machine learning.
- Developed and evaluated machine learning models for classification, regression, and clustering, and created dashboards and data visualizations to communicate results.

Projects

ApplyFlow — Job Application Tracking Platform

- Developed a full-stack job application tracking platform using React, TypeScript, Tailwind CSS, Django REST Framework, REST APIs, and Google Sheets API with responsive CRUD workflows, application status tracking, search, sorting, filtering, dashboards, and daily/weekly goals.
- Built reusable React components and interactive application-management workflows with demo, connected Google Sheet, and private workspace modes, improving usability and maintainability across the frontend.
- Integrated frontend and backend services through REST APIs, implemented persistent Google Sheets data management, added Playwright end-to-end testing for critical workflows, and deployed the application using Git, Vercel, and Render.

Reparo — Web Accessibility & Contrast Utility

- Developed a responsive accessibility utility using HTML5, CSS3, JavaScript modules, and Vite with WCAG contrast calculations, AA/AAA evaluation, live previews, accessible color suggestions, and palette parsing from CSS variables, JSON, and HEX values.
- Implemented semantic HTML, keyboard-accessible controls, visible focus states, palette comparison/export workflows, Cypress end-to-end testing, and automated accessibility testing with axe-core and cypress-axe.

Education

Master of Science in Computer Science

Aug 2023 – May 2025

University of Texas at Tyler

GPA: 3.6

Bachelor of Technology in Electronics and Communication Engineering

Aug 2019 – May 2023

Sri Padmavati Mahila Visvavidyalayam

GPA: 7.8
